These files are confidential and intended only for the addressee. Each opening is recorded.

Files with a code can be opened by anyone holding this message, the code included. Please do not forward it.

Files marked Verified send a code to the address this message was sent to. Forwarding the link does not carry access with it.

Files marked Link open for anyone with the address. Treat the link itself as the key.

Link — opens directly. No code needed.

Pin — you will be asked for the six-digit code shown above.

Verified — you will be asked for the email address this message was sent to, and a code will be sent there. The code goes to that address only, so a forwarded link will not open for someone else.

Links expire on the dates shown. If one has lapsed, open it anyway and you can request a new one at the same address this was sent to.
